Agenda Joint ccNSO/GNSO IDN Working Group 17 May 2011

1. Follow up with implementation of Single Character IDN TLD upon the approval of the respective councils

2. Walk through and consideration of the IETF DNSEXT requirements document: http://tools.ietf.org/html/draft-ietf-dnsext-aliasing-requirements-01

3. Universal Acceptance of IDN TLDs

- Who are the right stakeholders to reach out to and what is the appropriate channel
- What, if any, initiatives should be recommended to be initiated by ICANN (and how/aims/etc.):
        - registrant/registrar/registry related
        - internet infrastructure providers (ISPs, hosting providers, etc.)
        - internet application providers (databases containing domains/urls, e.g. facebook
          profiles)
        - other internet applications (browsers, mail applications, etc.)
- What, if any, policies should be recommended (e.g. should/could/is it appropriate for ICANN to set or update any requirements for IDN registrars/registries/registrants)
