

Contact Repository Implementation Telephone Conference

31 January 2013

Attendees:

Isak Jacobsen
Antoinette Jonson
Hitoshi Saito
Luis Diego Espinoza

ICANN Staff:

Bart Boswinkel
Kristina Nordström

- Bart Boswinkel presented his working document about a governance model for the contact repository.

He highlighted that the relationships with all the different parties connected to the repository need to be governed and maintained, such as following:

Relation with Service Provider
Policy for Users (who can subscribe to the service)
Relation with Subscribers

He also noted that since only cc managers should be allowed to subscribe, the subscription process has to go through the ccNSO.

He suggested that the process of an incident should be evaluated together with the service provider.

- The Chair pointed out that the Working Group needs to start working on a report in order to provide the community with information.
- Antoinette noted that it could be helpful to include Hitoshi's diagram in the report to provide the community with a visual aspect as well.
- It was noted that the group could do research within the ccTLD community to find out how many managers would be interested in joining a repository on the drafter terms.

Action items for the next call on 28 February:

- Bart Boswinkel to prepare an outline for the funding options.
- The Chair to update the work document to incorporate discussed issues.

- Antoinette to review the language in the work document as soon as it has been distributed by the chair.
- Hitoshi Saito to update the repository diagram to reflect the discussion on the call.
