

Candidate Statement: Pablo Rodriguez for ccNSO Council

Dear ccNSO community members,

I am honored to submit my candidacy for the ccNSO Council. As an experienced professional within the domain of internet governance and country code top-level domain (ccTLD) management, I bring a deep commitment to advancing the mission and goals of the ccNSO. My diverse background in policy development, technical coordination, and community engagement enables me to contribute effectively to the dynamic and evolving ccTLD landscape.

- **Experience and Commitment**

For over a decade, I have been actively involved in the internet governance ecosystem, working alongside stakeholders from diverse sectors to ensure the stability, security, and resilience of the DNS. My role in various working groups, including IGLC, GRC, PGA WG, SOPC, Fellowship Selection Committee, Travel Funding, Triage Committee and CSC most recently, has allowed me to develop a nuanced understanding of the policy and operational challenges that ccTLD managers face.

I am committed to promoting collaborative efforts that strengthen the global internet infrastructure while ensuring that the voices of ccTLD managers, especially those from underrepresented regions, are heard and reflected in policy decisions. I believe in fostering transparent and inclusive dialogue that empowers all members to participate actively in the decision-making process.
