12. Membership application issue.
   The Secretariat was informed that in the context of a recent membership application the name of the administrative contact (the primary contact) in the IANA Database was not correct.
   The Council discussed this on list and some Councillors expressed a concern that the person applying on behalf of the ccTLD manager is not listed as a contact in the IANA Database.

Effectively 3 options were discussed:

1. It is IANA’s and current operator’s responsibility to make sure that the database is accurate and the proposal going forward is to wait for IANA/current operator to perfect/update its records before the Council approve the membership.
2. Alternatively, Council could provide a conditional approval (say for 3 months) until the entries in the database are corrected. This way the current operator will have the task to update the database within the given period.
3. The Council should not be concerned and approve the application.
