Subject: [Ccnsoscretariat] RZERC report for the ccNSO Council
Date: Tuesday, October 17, 2017 6:07:19 AM

Dear ccNSO Council,

please find attached my most recent report on RZERC and an addendum.

Best regards,
Peter

2017-10-17, Peter Koch, DENIC (DE)

ccNSO appointee to the Root Zone Evolution Review Committee (RZERC)

Since the previous report (2017-08-23), RZERC has conducted two teleconferences on 2017-09-25 and 2017-10-16.

The approved minutes of the September meeting are available at

The committee has also started to discuss internally a longer list of potential topics around the root zone and root zone distribution. The purpose of this exercise is to committee members' perspectives of topics within or outside the scope of RZERC in a "temperature of the room" sense.

No items of concern (as per charter and mission) have been brought to the committee, yet.

For the Abu Dhabi ICANN meeting, two RZERC meetings have been scheduled:

29 OCT 2017 09:00 "regular meeting" (closed, with transcripts and minutes made public afterwards)

01 NOV 2017 14:00 "public meeting" (open)

The RZERC report to the ccNSO on 31 OCT will address the procedures document and the discussion described above.

PS: (not part of the report)

While several committees might address a variety of aspects that touch upon the root zone and the DNS root in general, a topic might also be considered in-scope for none of the committees. One reason might be that an issue is considered "operational" in nature, but the community should follow this closely. Examples that have been discussed within the ccNSO are

- o the technical checks performed by the IANA (upon changes to the TLD NS-RRSet)
- o the technical checks performed by the RZM (same)
- o crypto algorithm eligibility (for DS records)

The KSK rollover discussion and further developments might also be worth looking into.
