

Nigel Phair (.au)

Standing for ICANN Board Seat #11

Dear ccNSO Member

I respectfully request your support by casting your vote for me for ICANN Board Seat #11. First of all, I would like to thank those who have nominated me.

I am seeking election to the ICANN Board to actively contribute to the ongoing growth and development of the ccNSO community in the ICANN environment. I am also seeking to be an effective link between the Asia Pacific region and the ICANN Board.

I am a Non-Executive Director of the Australian Domain Administrator – the administrator and self-regulatory policy body for the .au ccTLD – where I participate in both the domestic level as well as active contribution to the Asia Pacific Top Level Domain (APTLD) Association where I was a speaker at its most recent meeting. I was also part of the team which created the APTLD Strategic Plan 2019 – 21 and am assisting in the organisation of APTLD 77 in Melbourne, Australia in 2020.

I am Executive Director of the University of New South Wales Cyber, responsible for research, training & education within a multi-disciplinary academic cyber environment. I previously enjoyed a 21 year career as a member of the Australian Federal Police attaining the rank of Detective Superintendent. I have worked within the online environment for over 17 years in government, private sector and academia.

I believe I have a broad cross-section of skills, knowledge and aptitude to provide high-level governance, risk and strategy expertise within the ICANN organisational environment and provide stakeholders with the trust and confidence of the organisation as a whole.

My diverse career in both executive and non-executive roles allow me to listen to and represent the broad ICANN stakeholder group, and specifically the ccNSO community on the ICANN Board. I hold post-graduate qualifications in Law and Public Policy and am a Graduate of the Australian Institute of Company Directors. My personal style is to be open and approachable. I enjoy discussing a broad range of professional and social topics.

I make a commitment to give my best and bring my experience to bear and contribute in furthering the work of the ccNSO in the ICANN and global internet community.

I look forward to having this opportunity to serve as an ICANN Board member and to working with all the ccNSO members.
