# Use of 2-character Single Letter, Single Digit Combinations as gTLD string

The ccNSO Council requests

**the current reservation be maintained  
not available for registration**

# IDN (g)TLDs

## **IDN ccTLDs:**

- ccTLD Fast Track rules
- IDN ccTLD policy

# IDN (g)TLDs

- Use of single and two character IDNs
- Development and impact of IDN variant management framework

# IDN gTLDs & IDN ccTLDs

The ccNSO Council suggests:

The establishment of a **small working group** to assess the ongoing discussion and efforts.

Goal: Avoid diverging / different sets of rules pertaining to management of variants

# Confusing Similarity Review under gTLD & ccTLD Processes

The ccNSO Council believes:

It would be appropriate to **design a common approach**, i.e. at a minimum ensure that there is mutual understanding of the need for and different methods for evaluation of confusing similarity

**Thank you!**
