

GAC Working Group meeting

24.06.2007

Attendees

Bart Boswinkel, ICANN Staff
Keith Davidson, .nz
Chris Disspain, .au
Oscar Robles, mx
Gabriella Schitteck, ccNSO Secretariat

New European GAC Working Group Representative

As Bart Vastenburg has resigned from his position on the GAC Working Group, a replacement from the European region is now needed.

The formal way to proceed is to ask the ccNSO Council to resolve that a new working group member is appointed.

It was agreed that Keith will approach the European ccNSO representatives and ask them to appoint a replacement in time for the Council meeting.

Upcoming meetings with the GAC

There will be three meetings with the GAC during the two coming days:

25th June:

- DNSSec session

The session is hosted by Steve Crocker.

- IDN session

Discussions on the issues paper.

26th June:

- ICANN Regions report

David will give an update of the Regions paper which is now out for final public consultations.

- Wildcard in ccTLDs

Chris will give a short overview on how wildcards are used for Cameroon (.cm). The aim is to raise awareness of what problems it can cause, especially if used in IDN TLDs and that the issue probably will need to be dealt with in future.

- Case Studies of ccTLDs

Oscar Robles will ask Oscar Moreno (.pr) to give a 10 minute update of the Puerto Rico ccTLD. Oscar will also try to approach another Caribbean ccTLD, preferably government run, to give a second presentation.

If this can't be arranged, Jacob Malthouse will be asked to summarise what issues came up in the Caribbean meeting.

Another alternative is a presentation by Keith on the IPv6 deployment in .nz.

- IDN Issues paper

Chris will update the GAC on the status of the IDN Issues paper.
