

Contact Repository Implementation Working Group Telephone Conference

14 February 2013

Attendees:

Antoinette Johnson, .vi
Isak Jacobsen, .fo
Hitoshi Saito, .jp

ICANN Staff:

Bart Boswinkel
Kristina Nordström

The group discussed how to make the work document about the repository comprehensive also to people without a technical background.

The definition of the term 'use cases' established by the previous Working Group (Incident Response) was confirmed and discussed.

It was decided that Antoinette Johnson should continue her review of the language and phrasing in the work document and that Isak Jacobsen would work with her as a second reader from a technical standpoint.

It was decided that Isak would also look at the document on funding models and provide feedback to Bart Boswinkel or the entire group.

Bart offered to work with Hitoshi on the questions he raised in the group, and share it with the other members on the next call.

The next call is set to 28 February.
