

Contact Repository Working Group Telephone Conference

28 February 2013

Attendees:

Bart Boswinkel, ICANN
Luis Diego Espinoza, .cr
Antoinette Johnson, .vi
Kristina Nordström, ICANN

Apologies:

Isak Jacobsen, .fo

- The working group discussed the funding models and how they should be presented to the ccNSO community.
- Antoinette Johnson suggested that the funding model document should include a rational. This was agreed and Bart Boswinkel suggested that the rational of the previous working group could be useful.
- It was agreed that the funding model document should also include a round number of the possible cost for the individual ccTLDs to be part of a contact repository.
- Antoinette noted that she and Isak would work on the section about use cases and present the result to the working group as soon as possible.
- Antoinette suggested that the group should include an appendix in the work document with an explanation of the acronyms related to the work with the contact repository.
- The Chair suggested that additional technical requirements for a possible external provider could be included in the document. It was agreed that the current requirements are enough for a request of information at this stage.
- The group decided that the presentation to the ccTLD community should include both a document and an oral presentation, explaining the 4 key areas: An overview of the function; the requirements; the governance model and the funding model.
- It was further decided that the presentation to the community should be made at the Durban meeting. Bart also suggested that this topic could be of interest for Tech Day.
